Surface treatment application requires closing lanes on northbound I-75 in Oakland County starting Tuesday

Fast facts:

- Northbound I-75 will have a continuous single-lane closure from south of M-102 (8 Mile Road) to I-696 starting Tuesday, June 14, until the end of the month.
- Weather permitting, two lanes will be closed from 9 a.m. to 3 p.m. weekdays.
- The lane closures are needed for high-friction surface treatment application.

HAZEL PARK, Mich. - Beginning Tuesday, June 14, the application of high-friction surface treatment will require closing lanes [on northbound I-75 from south of M-102 \(Eight Mile Road to I-696\)](#). Weather permitting, two lanes will be closed between the hours of 9 a.m. and 3 p.m. on weekdays, and from 5 a.m. to 7 p.m. on weekends.

High-friction surface treatment is an epoxy-based product designed to improve traction for vehicles around the I-75 curve at Nine Mile Road. In addition, crews will install permanent recessed pavement markings on the northbound lanes. Application on the southbound lanes is expected to occur after the Independence Day weekend.

During work on the northbound lanes, northbound I-75 exit ramps to 8 Mile Road and I-696 will be maintained. When crews are working in the right lanes, the other entrance and exit ramps will be closed.
